2.2 OUR BUSINESS

Our Company was incorporated in Malaysia under the Act on 11 November 2020 as a private limited company under the name of Lim Seong Hai Capital Sdn Bhd. On 21 May 2021, our Company was converted into a public limited company to facilitate our listing on the LEAP Market which took place on 30 July 2021.

Following our listing on the LEAP Market, our Company completed the acquisition of 100% equity interest in LSHBB from LSH Resources on 15 October 2021, which resulted in the diversification of our Group's then principal activities to include construction and provision of construction-related services and solutions. We further diversified our Group's principal activities to include property development activities, following the completion of the acquisitions of 100% equity interest in ASSB and LSH Ventures from our Group's related parties on 17 April 2023.

To-date, we are a full-fledged construction company with capabilities to engage in a broad range of construction and engineering works, provide construction-related services and solutions, as well as supply construction products that are complementary to our construction and engineering works as well as the needs of the wider construction industry.

The three (3) main pillars of our construction segment are summarised in the following diagram:

In addition to our primary focus as a construction company, we are also involved in property development activities which allows our Group to leverage on our strengths and prowess in the construction segment, whilst providing an additional revenue stream for our Group through the sales of property units under our own property development projects.

We operate entirely in Malaysia where we carry out construction and engineering works, construction-related services and solutions as well as supply of buildings materials for construction projects located in various states in Malaysia. We also engage in the wholesale and retail of lighting and related M&E products as well as hardware products and tools through 12 physical retail stores located across the Klang Valley region, online e-commerce platforms such as Lazada and Shopee, as well as our own online stores. Apart from our wholesale and retail operations, we also provide rental services for machinery and equipment for construction projects based in Malaysia. In addition, the property development projects for which our Group is involved in are all located in the Klang Valley region.

For further details on our Group and our business, please refer to Sections 5 and 6 of this Prospectus respectively.

2.3 OUR COMPETITIVE STRENGTHS

Our competitive strengths are as follows:

(i) We have an integrated business model that is synergistic

Our Group operates an integrated and synergistic business model, where our full-fledged construction capabilities are complemented by our construction products sub-segment. Furthermore, our property development segment not only creates new opportunities for our construction segment but also benefits from cost synergies by leveraging on our construction segment's strengths and prowess in construction and engineering works, as well as provides an additional revenue stream for our Group through the sales of property units. Integral to our operations is our BEST Collaboration Framework, which enables us to collaborate with our clients (such as land owners, property developers or contractors) to tap into our Group's expertise and experience in the construction industry to achieve the shared objective of value-enhancement beyond ordinary construction and engineering works. This integrated business model improves operational efficiency, optimises cost, improves build quality, ensures timely project completion, reduces risks of being affected by supply chain disruptions, as well as enjoy lower costs through bulk purchases and direct distribution channels.

(ii) We have a proven track record in the construction industry

Our Group's footprint in the construction industry first began in 1990s via the construction products sub-segment through LSH Lighting and Knight Auto, as well as M&E works provided through LSH Lighting. Our Group subsequently widened our presence in the construction industry by growing our track record in construction and engineering works following the acquisitions of LSHBB and ASSB. As at LPD, LSH Lighting, LSHBB and ASSB have collectively completed 53 construction and engineering work projects (including those that were completed by LSHBB and ASSB prior to the acquisitions of LSHBB and ASSB by our Company in October 2021 and April 2023 respectively) with a total combined value approximately RM1.22 billion. This extensive experience and reputation in the construction industry have positioned us competitively in the industry, enabling us to tender for larger construction contracts.

(iii) We have a diversified range of construction capabilities across various sub-segments within the construction industry

We have a diversified portfolio of construction projects which we have completed and are presently undertaking for various sub-segments within the construction industry. These include building construction as well as infrastructure construction and engineering work projects. Our broad range of expertise and vast experience allow us to serve various construction sub-segments, reducing the risk of over-reliance on the performance of any particular construction sub-segment and enabling us to promptly react to market changes. As a G7 contractor, we are also qualified to undertake construction and engineering works and/or construction-related services and solutions projects with no tender limit to contract value.

(iv) We have a qualified and experienced Board and management team

Our Group is managed by an experienced management team, led by our Executive Vice Chairman, DLKG, who has over 30 years of experience in construction-related industries. Supported by our other executive directors, our management team brings extensive expertise across finance, business strategies, construction, engineering, construction products and property development. Our Non-Executive Chairman, Tan Sri KC Lim, with over 40 years of experience in the field of construction and property development related industries, along with the expertise of our Independent Non-Executive Directors in their respective fields, also provide our Group a broad range of valuable insights on the needs and market conditions of the construction and property development industries, which allow us to better serve our clients.

(v) We have a strong construction orderbook that will sustain us in the near or near-mid term

As at LPD, our Group has a strong construction orderbook with 16 ongoing construction and engineering work projects with a total outstanding orderbook value of approximately RM1.52 billion. These projects include four (4) building construction projects and 12 infrastructure construction and engineering work projects. Revenue from our outstanding orderbook is expected to be progressively recognised over the next six (6) financial years up to the FYE 2030. Notwithstanding this, we are also committed to continue pursuing new tenders and proposals to replenish and expand our construction and engineering works orderbook.

For further details on our competitive strengths, please refer to Section 6.7 of this Prospectus.

2.4 FUTURE PLANS AND STRATEGIES

Our future plans and strategies are as follows:

(i) We plan to continue building our orderbook for construction and engineering works as well as construction-related services and solutions sub-segments, whilst exploring potential infrastructure concession ownership opportunities

Our overall business strategy focuses on leveraging our core strengths and competency in providing construction and engineering works as well as construction-related services and solutions. As at LPD, our total outstanding construction and engineering works orderbook stood at approximately RM1.52 billion, which is expected to be recognised as revenue progressively until the FYE 2030. We aim to build resilience for our orderbook by actively submitting tenders and proposals to secure more construction and engineering work projects. We will also endeavour to secure more construction and engineering work projects through our BEST Collaboration Framework, which allows us to recognise an additional revenue stream over and above progress billings from construction and engineering works that we carry out. Additionally, we plan to explore concession ownership for infrastructure construction projects. As a concession owner, we will not only perform the construction and engineering works for the project, but also be responsible for the operations and maintenance of these assets once construction is completed, which will provide recurring income through the operations and maintenance of such assets.

To this end, we have allocated RM108.86 million of the gross proceeds to be raised from the Public Issue to fund the working capital required for our Group's ongoing and future construction and engineering work projects.

(ii) We intend to complete our existing property development projects and continue expanding our portfolio of property development projects

Our Group's property development division will focus on overseeing the continued construction of our LSH Segar Project and the launching of our Lake Side Homes Project in the second half of 2025, which carry estimated GDV of approximately RM395.86 million and RM1,153.96 million respectively. These projects will generate revenue progressively until the FYE 2030 and establish our brand presence in the property development industry, particularly in the Klang Valley region. The total construction costs for LSH Segar Project and Lake Side Homes Project are estimated to amount to approximately RM1.04 billion, which will be funded via the gross proceeds to be raised from the Public Issue as well as internal funds derived from, among others, progress claims and/or bank borrowings. Looking ahead, we plan to expand our portfolio of property development projects by identifying new landbank and/or development opportunities.

(iii) We intend to establish facility management services as a new business segment in our Group

Our Group plans to establish facility management services as a new business segment which will serve as a source of new and recurring income for our Group. We expect to offer facility management services which are expected to include operational management, maintenance services, housekeeping and cleaning, security and surveillance monitoring, health and safety compliance, and landscaping. As a prelude to the establishment of this new business segment in our Group, we have secured a contract for the provision of facility management services which entails the management of the 'Blue Pool' facility (which features a dancing symphony fountain, blue corridor, fog and lighting effects) under the 'River of Life' transformation project at Kuala Lumpur for a period of three (3) years. We have also entered into a BEST Collaboration Framework agreement with Service Master (M) Sdn Bhd, which led to an agreement-in-principle to jointly manage the operations and maintenance of the Kuala Lumpur Tower ("**KL Tower**"). As at LPD, we have neither obtained site possession of the KL Tower nor commenced the facility management services at the KL Tower as we are in the midst of negotiating the definitive terms of the concession agreement with the Malaysian Government for the operations and maintenance of the KL Tower.

We also intend to evaluate and explore opportunities to operate and manage the facilities of residential buildings for which we were involved in the construction and/or development in.

For further details on our future plans and strategies, please refer to Section 6.8 of this Prospectus.

2.5 RISK FACTORS

Our business is subject to a number of risk factors which may have a material adverse impact on our business, financial condition and results of operations. The following is a summary of the key risk factors that we face in our business operations:

(i) Our business and financial performance are largely dependent on our ability to secure new projects to replenish our orderbook

Although we have an orderbook which will be recognised progressively over the next six (6) financial years, there is no assurance that we will be able to continue to secure new projects in the future. In the event we are unable to secure any new projects on a continuous basis, our orderbook will decline over time and consequently result in adverse effects on our financial performance in the future. Any variation in the scope of work for the projects secured which result in reduction in the contract value may also adversely affect our financial performance. As such, there can be no assurance that our current orderbook can be continually maintained at a healthy level in the future.

(ii) We are exposed to credit and liquidity risks as a result of delays in collection, non-recoverability and/or settlement of trade receivables and/or retention sums through contra payment via payment-in-kind

Although our cash flow or liquidity positions have not been materially affected by the delays in collection and/or non-recoverability of trade receivables and/or retention sums and/or contra payment via payment-in-kind in the past, there is no assurance that we will not face potential cash flow and working capital constraints should there be any delay and/or non-collection of any trade receivables and/or retention sums and/or contra payment via payment-in-kind in the future. Should this occur, this may result in a material adverse impact on our financial condition, our ability to pay our subcontractors and/or suppliers, and/or affect the progress and completion of our projects.

2. PROSPECTUS SUMMARY *(Cont'd)*

(iii) Our business and financial performance may be affected if there is any delay or cancellation of our projects

We may be subject to external factors that are beyond our control and which may affect the timely completion of our projects. These include, among others, timely receipt of regulatory approvals and permits required to carry out the projects, satisfactory performance of subcontractors appointed, continuous supply of construction materials, equipment or labour, adverse weather conditions, economic downturn, changes in government policies as well as legal proceedings affecting our property development projects. Any delays in completing a project may affect our revenue recognition and billings, which, in turn, may adversely affect our financial performance. Project delays could also lead to cost overruns and/or LAD claims or penalties being imposed on us by our customers, which will further affect our financial performance. Our reputation and future business opportunities may also be detrimentally affected by project delays caused by us.

(iv) We face the risk of cost overruns for our construction and engineering work projects

Our building material costs, such as steel and concrete materials are subjected to price fluctuations. Any unfavourable fluctuations in prices of construction materials, subcontractor costs and/or labour costs during the period of our construction and engineering work projects may result in cost overruns which may adversely affect our construction and engineering work projects' profitability and financial performance if we are unable to pass any of these cost increases to our clients.

(v) Our actual sales value may be lower than the estimated GDVs of our property development projects

The GDVs of our Group's ongoing property development projects are estimated based on our market study including the average selling price of similar properties in the surrounding areas and other assumptions which may ultimately prove to be inaccurate. The actual sales value may be different due to changes over time which are subjected to, among others, factors affecting the demand and supply for such properties, ease of obtaining financing, economic growth rate of the country and interest rates. As such, there is no assurance that the estimated GDVs will reflect the actual sales value achieved by our property development projects.

(vi) Our business is concentrated on a few major customers, some of which are related parties

Some of our major customers had contributed substantially to our Group's revenue during the Financial Years Under Review, the details of our major customers of which are set out in Sections 6.18 and 8.1.9 of this Prospectus. Moving forward, some of these major customers are expected to collectively contribute approximately 33.27% of our total outstanding orderbook as at LPD, further details of which are set out in Section 8.1.9 of this Prospectus.

While we are not materially dependent on any of these customers, our Group is exposed to customer concentration risk from time to time depending on the quantum of the projects secured and the tenure of contracts.

As such, our financial performance may be materially and adversely affected if we were to lose one (1) or more of our major customers (including any substantial reduction in the amount of products supplied and services provided to them) and are unable to replace them with new customers in a timely manner, encounter difficulty in collecting payments from these major customers, or if there is any substantial delay or termination of the projects undertaken with these major customers.

For further details on our risk factors, please refer to Section 8 of this Prospectus.

2.6 USE OF PROCEEDS

We expect to use the gross proceeds of RM116.16 million from our Public Issue in the following manner:

Purpose	Estimated timeframe for use of proceeds from the completion of our Transfer of Listing	RM'000	% of total gross proceeds raised from our Public Issue
Working capital for our Group's construction projects	Within 24 months	108,860	93.72
Estimated expenses in relation to our Transfer of Listing	Within one (1) month	7,300	6.28
Total		**116,160**	**100.00**

For further details on the use of proceeds arising from our Public Issue, please refer to Section 3.7 of this Prospectus.

3.3.3 Clawback and reallocation

The Retail Offering and Institutional Offering shall be subject to the following clawback and reallocation provisions:

(i) if the Issue Shares allocated to identified Bumiputera investors approved by the MITI ("**MITI Tranche**") are not fully taken up by such Bumiputera investors, such Issue Shares will be made available for subscription by Bumiputera public investors under the Retail Offering.

If after the above reallocation, the MITI Tranche is still not fully taken up by Bumiputera public investors under the Retail Offering, and there is a corresponding oversubscription for Issue Shares by the other Malaysian institutional investors under the Institutional Offering, the Issue Shares will be clawed back from the remaining MITI Tranche and allocated to the other Malaysian institutional investors under the Institutional Offering;

(ii) if there is still an undersubscription in the Institutional Offering after item (i) above and there is an oversubscription in the Retail Offering, the Offering Shares not taken up will be clawed back from the Institutional Offering and reallocated to the Retail Offering in the following order of priority (subject to each of them having applications for Offering Shares which have not been fully satisfied):

(a) firstly, to the other Malaysian Public; and

(b) secondly, to the Eligible Persons allocated in the manner as set out in item (iv) below;

(iii) if there is an undersubscription in the Retail Offering and there is an oversubscription in the Institutional Offering, the Issue Shares not taken up will be clawed back from the Retail Offering and reallocated to the Institutional Offering. However, if there is an undersubscription in the Retail Offering but no oversubscription in the Institutional Offering, such remaining Issue Shares available under the Retail Offering will be underwritten by the Sole Underwriter in accordance with the terms of the Retail Underwriting Agreement; and

(iv) any Issue Share not taken up by the respective Eligible Persons based on their pre-determined allocations shall be made available for application by the other Eligible Persons who have applied for excess Issue Shares in addition to their pre-determined allocation ("**Excess Issue Shares**"). Such Excess Issue Shares will be allocated to these other Eligible Persons on a fair and equitable basis in the following priority:

(a) firstly, allocation on a pro-rata basis to the Eligible Persons who have applied for the Excess Issue Shares based on the number of Excess Issue Shares applied for; and

(b) secondly, to minimise odd lots.

Any Issue Share not fully taken up by the Eligible Persons (after reallocation of the Excess Issue Shares to other Eligible Persons) will be made available for application by the Malaysian Public. Any Issue Share under the Retail Offering not applied for after being subject to the clawback and reallocation provisions above shall be underwritten by the Sole Underwriter in accordance with the terms of the Retail Underwriting Agreement.

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

The clawback and reallocation provisions will not apply in the event there is an oversubscription or undersubscription in both the Retail Offering and Institutional Offering at the closing of our Public Offering.

Notwithstanding the above, in the event there is an undersubscription for the Offering Shares, the subscriptions received for the Offering Shares will first be applied towards subscribing in full the Issue Shares under our Public Issue. Thereafter, any additional subscription for the Offering Shares will be allocated from the Offer Shares offered by the Selling Shareholders under the Offer for Sale and any remaining Offer Shares not subscribed for after the aforementioned allocation will be retained by the Selling Shareholders. For the avoidance of doubt, our Public Issue will take priority over the Offer for Sale in the event of an undersubscription of the Offering Shares.

The Offering Shares will be allocated in a fair and equitable manner and the basis of allocation for such Offering Shares shall take into account the desirability of distributing such Offering Shares to a reasonable number of applicants with a view of broadening our Company's shareholding base to meet the public shareholding spread requirement of Bursa Securities and to establish a liquid market for our Shares.

For the avoidance of doubt, the Offering Shares will be issued to successful applicants in a single tranche after the closing of our Public Offering and upon completion of the balloting of applications for the Offering Shares under the Retail Offering.

To the best of our knowledge and belief, there is no person who intends to subscribe for more than 5.00% of the Offering Shares.

3.3.4 Minimum subscription level

There is no minimum subscription level in terms of proceeds to be raised by our Company and the Selling Shareholders from our Public Offering. However, in order to comply with the public shareholding spread requirement under the ACE LR, the minimum subscription level in terms of the number of Offering Shares will be the number of Shares required to be held by public shareholders.

Under Rule 3.10(1) of the ACE LR, our Company is required to have at least 25% of the total number of Shares in the hands of a minimum number of 200 public shareholders, each holding not less than 100 Shares at the point of listing of our Company on the ACE Market. If the aforementioned public spread requirement is not met, our Company may not be able to proceed with the Transfer of Listing. In such event, we and the Selling Shareholders will return in full, without interest, all monies paid in respect of the application for the Offering Shares. If such monies are not returned within 14 days after we and the Selling Shareholders become liable to do so, our Company and the Selling Shareholders (including the officers of our Company and the Selling Shareholders, where relevant) shall then be jointly and severally liable to return such monies with interest at the rate of 10% per annum or such other rate as may be specified by the SC from the expiration of that 14-day period.

For information purpose, based on the Record of Depositors of our Company as at LPD, the public shareholding spread of our Company is approximately 5.80%, held by a total number of 58 public shareholders.

For the avoidance of doubt, the remaining RM3.88 million of the estimated expenses for the Transfer of Listing (including the Public Issue) will be charged to the retained profits of our Company.

The Offer for Sale will not have any effect on our share capital.

As at the date of this Prospectus, we only have one (1) class of shares in our Company, namely ordinary shares.

The Issue Shares will, upon issuance and allotment, rank equally in all respects with our existing Shares including voting rights, and the applicants will be entitled to all rights, dividends and other distributions that may be declared after the date of issuance and allotment of the Issue Shares, subject to any applicable Rules of Bursa Depository.

Subject to any special right attaching to any Shares which we may issue in the future, our shareholders shall, in proportion to the amount paid up on the Shares held by them, be entitled to share the profits paid out by us as dividends or other distributions. Similarly, if our Company is liquidated, our shareholders shall be entitled to the surplus (if any), in accordance with our Constitution after the satisfaction of any preferential payments in accordance with the Act and our liabilities.

At every general meeting of our Company, each of our shareholders shall be entitled to vote in person, by proxy, by attorney or by other duly authorised representative. Subject to the ACE LR, any resolution put to vote at the meeting shall be decided by way of poll. On a poll, each shareholder present either in person or by proxy, attorney or other duly authorised representative shall have one (1) vote for every Share held or represented. A proxy may but need not be a member of our Company. However, on a show of hands, each shareholder present either in person or by proxy, attorney or other duly authorised representative shall have one (1) vote.

Market price of our Shares

Our Company has been listed on the LEAP Market since 30 July 2021. The trading liquidity of our Shares has generally been very low due to the following reasons:

(i) our Company has a lower public shareholding spread of approximately 5.80% on the LEAP Market as at LPD as compared to the public shareholding spread requirement under the ACE LR of at least 25.00%; and

(ii) the trading of our Shares on the LEAP Market is restricted to sophisticated investors as specified under Part I of Schedules 6 and 7 of the CMSA, thereby limiting the type of investors who are able to participate in the active trading of our Shares on the LEAP Market.

Furthermore, in support for our Transfer of Listing (i.e. not to extend an exit offer as required under Rule 8.06(1)(c) of the LEAP LR for the withdrawal of our listing from the LEAP Market), all the shareholders of our Company had vide their respective written undertakings, irrevocably and unconditionally agreed and undertaken to, among others, continue to hold and not dispose of, transfer or reduce their entire shareholdings in our Company from the date of such written undertakings until the completion or termination (as the case may be) of the Withdrawal of LEAP Listing.

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

Notwithstanding the above, you should note that the market price of our Shares upon our ACE Listing is subject to the vagaries of market forces and other uncertainties that may affect the price of our Shares. You should form your own views on the valuation of the Offering Shares and reasonableness of the bases used before deciding to invest in our Shares. You are also reminded to carefully consider the risk factors as set out in Section 8 of this Prospectus before deciding to invest in our Shares.

Expected market capitalisation

Based on the Offering Price of RM0.88 per Offering Share, the total market capitalisation of our Company upon our ACE Listing will be approximately RM737.76 million.

3.6 DILUTION

Dilution is the amount by which the price paid by the retail and institutional investors for the Offering Shares exceeds our pro forma consolidated NA per Share immediately after our Public Offering.

Our pro forma consolidated NA per Share as at 30 September 2024 was approximately RM0.65 per Share after adjusting for the interim single-tier dividend of 1.94 sen per Share amounting to approximately RM13.70 million in respect of the FYE 2024 which was paid to our shareholders on 13 December 2024 ("**Dividend Payment**") but before our Public Offering.

After the Dividend Payment and after giving effect to the issuance of 132,000,000 new Shares under our Public Issue and the use of gross proceeds raised from our Public Issue, our pro forma consolidated NA per Share based on our enlarged issued Shares upon our ACE Listing of 838,360,208 Shares would be approximately RM0.68 per Share. This represents:

(i) an immediate increase in the pro forma consolidated NA per Share of approximately RM0.03 or 4.62% to our existing shareholders; and

(ii) an immediate dilution in the pro forma consolidated NA per Share of approximately RM0.20 or 22.73% to new investors.

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

The table below illustrates such dilution on a per Share basis:

Increase in pro forma consolidated NA per Share to our existing shareholders	0.03
Dilution in pro forma consolidated NA per Share to new investors	0.20
Dilution in pro forma consolidated NA per Share to new investors as a percentage of the Offering Price	22.73%

Save for the subscription of 1,000,000 Shares by Dato' Seri Ir. Hj. Mohd Noor Bin Yaacob, our Independent Non-Executive Director, for a total cash consideration of RM420,000 (which is equivalent to RM0.42 per Share) which was completed on 27 May 2022, our Directors, Key Senior Management, substantial shareholders or persons connected with them have neither acquired any Shares nor entered into any transaction which grants them the right to acquire any Shares which resulted or may result in cash contribution to our Company during the past three (3) years up to LPD.

3.7 USE OF PROCEEDS

We expect to use the gross proceeds of RM116.16 million from our Public Issue in the following manner:

Purpose	Estimated timeframe for use of proceeds from the completion of our Transfer of Listing	RM'000	% of total gross proceeds raised from our Public Issue

Total		**116,160**	**100.00**

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

Details on the use of proceeds from our Public Issue are as follows:

Infrastructure construction and engineering works projects	(ii)	20,000
Future construction project(s)	(iii)	10,000
Total		**108,860**

(i) We intend to allocate RM78.86 million of the gross proceeds to partly defray the costs related to the main building and structural works for our Group's residential and mixed development construction projects, which include payments for the following:

Nature of expenditure	RM'000
Subcontractor services such as reinforced concreting and structural works, aluminium works, tiling works, plaster ceiling works, brick works as well as plastering works	56,000
Purchase of building and/or construction materials from suppliers	20,000

Total	**78,860**

For information purpose, the abovementioned expenditures make up the largest components of the construction costs for our Group's residential and mixed development construction activities. However, depending on the operating and funding requirements of our Group at the point of utilisation, the proceeds to be utilised for each component of expenditure as set out in the table above may change.

For the avoidance of doubt, the gross proceeds earmarked for these purposes are expected to be utilised across the following three (3) residential and mixed development construction projects of our Group:

Name	LSH Segar Project	Sentul Ria Project	Lake Side Homes Project

Preliminary construction works subsequently resumed in August 2024, with completion at approximately 0.52% as at LPD and full completion expected by the fourth quarter of 2029

Note:

* *Please refer to Section 13.6 of this Prospectus for further information on the interim stay order.*

The exact allocation of such gross proceeds across the abovementioned three (3) residential and mixed development construction projects of our Group cannot be ascertained at this juncture as it is dependent on the timing of receipt of the proceeds raised from our Public Issue as well as the status of the construction project and the actual funding requirement of these projects at the point of utilisation.

Our Group will also fund the remaining construction costs (including any shortfall) for the abovementioned three (3) residential and mixed development construction projects principally using internal funds derived from, among others, progress claims and/or bank borrowings. For information purpose, as at LPD, our Group has secured banking facilities amounting to RM88.00 million from MBSB Bank Berhad to part-finance the construction costs of the LSH Segar Project, whilst the construction costs of the Sentul Ria Project and Lake Side Homes Project are funded by internal funds. However, the exact breakdown on the source of funding of these projects cannot be determined at this juncture as they are subject to the status of the work progress and timeliness of receipt of payment from progress claims for these (3) projects, as well as the status of the work progress and funding needs of the other construction projects of our Group.

Notwithstanding the above, if our Group is unable to fully utilise the proceeds allocated for these projects, any excess in the proceeds allocated for these purposes will be reallocated to other ongoing and/or future construction projects (including any infrastructure construction and engineering works projects) to be identified by our Group.

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

(ii) As at LPD, we have 12 ongoing infrastructure construction and engineering works projects with total outstanding orderbook of approximately RM505.36 million, the details of which are set out in Section 6.2.1(i)(b) of this Prospectus. In this regard, we intend to allocate RM20.00 million of the gross proceeds to fund the working capital requirement of these infrastructure construction and engineering works projects in the following manner:

Nature of expenditure	**RM'000**
Subcontractor services such as site clearing and earthworks, reinforced concreting and structural works as well as road paving works	13,300
Purchase of construction materials from suppliers	5,700
Construction workers' salaries and wages	1,000
Total	**20,000**

For information purpose, the abovementioned expenditures make up the largest components of the construction costs for our Group's infrastructure construction and engineering works. However, depending on the operating and funding requirements of our Group at the point of utilisation, the proceeds to be utilised for each component of expenditure as set out in the table above may change.

The exact allocation of such gross proceeds across the 12 ongoing infrastructure and engineering works projects of our Group as set out in Section 6.2.1(i)(b) of this Prospectus cannot be ascertained at this juncture as it is dependent on the timing of receipt of the proceeds raised from our Public Issue as well as the status of the construction project and the actual funding requirement of these projects at the point of utilisation.

Our Group will also fund the remaining construction costs (including any shortfall) for these 12 infrastructure construction and engineering works projects principally using internal funds derived from, among others, progress claims and/or bank borrowings. However, the exact breakdown on the source of funding of these projects cannot be determined at this juncture as they are also subject to the status of the work progress and timeliness of receipt of payment from progress claims for these 12 projects, as well as the status of the work progress and funding needs of the other construction projects of our Group.

Notwithstanding the above, if our Group is unable to fully utilise the proceeds allocated for these projects, any excess in the proceeds allocated for these purposes will be reallocated to other ongoing and/or future construction projects (including any building construction projects) to be identified by our Group.

(iii) Our Company also intends to allocate RM10.00 million of the gross proceeds to fund any future construction projects which our Group may secure over the 24-month period subsequent to the completion of our Transfer of Listing. These may include payment of performance bonds for tender jobs and funding of working capital requirements which may include payment for subcontractor services, purchase of building and/or construction materials as well as payments for construction workers' salaries and wages. As this relates to potential projects which have yet to be secured, the exact breakdown for the use of such proceeds between these components of expenditures cannot be determined at this juncture.

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

If our Group is unable to secure any new construction projects over the 24-month period subsequent to the completion of our Transfer of Listing or fully utilise the proceeds allocated for this purpose, any excess in the proceeds allocated for this purpose will first be reallocated to fund the working capital for our Group's existing residential and mixed development construction projects stated in item (i) above, followed by our Group's existing infrastructure construction and engineering works projects stated in item (ii) above.

3.7.2 Estimated expenses in relation to our Transfer of Listing

Any variation in the actual amount of expenses will be adjusted to or from the gross proceeds allocated for the working capital for our Group's future construction projects stated in Section 3.7.1(iii) above.

Pending the use of proceeds from our Public Issue for the purposes as set out above, we intend to place such proceeds in interest-bearing accounts with licensed financial institution(s) and/or money market instrument(s), as our Board may deem fit. Any interest or profit derived from such deposit(s) and/or any gain arising from such market instrument(s) will first be used to fund the working capital for our Group's existing residential and mixed development construction projects stated in Section 3.7.1(i) above, followed by our Group's existing infrastructure construction and engineering works project stated in Section 3.7.1(ii) above, and thereafter our Group's future construction projects stated in Section 3.7.1(iii) above.

For the avoidance of doubt, our Company will not receive any proceeds from the Offer for Sale. The Offer for Sale will raise gross proceeds of up to RM51.92 million which will accrue entirely to the Selling Shareholders. Section 2.11(ii) We intend to further digitise our retailing of lighting products, and hardware and tools	At present, apart from our physical retail stores, we have been retailing our lighting products, hardware and tools through our own online store and third-party e-commerce platforms such as Lazada and Shopee. We plan to increase our sales from the retailing of lighting products, hardware and tools and further expand the reach to outside Klang Valley area through the following methods: • We intend to engage a multi-channel e-commerce service provider which will allow us to increase the number of our online channels. The multi-channels e-commerce service provider will not only allow us to increase our product visibility through multiple e-commerce platforms, but also allow us to reach out to customers through social media platforms (such as Facebook and Instagram) and online messaging platforms such as WhatsApp. We will be able to automate the dissemination of product information and marketing promotions through various channels. • Implementing a real-time inventory system so that we can better monitor our stocks. The available number of stocks displayed on the various online channels can also be updated on a real-time basis. We believe this will improve our efficiency and enhance customer satisfaction.	In January 2022, our Group engaged a multi-channel e-commerce service provider to advise LSH Lighting's in-house sales and marketing team (which had been in place prior to our Company's listing on the LEAP Market in July 2021) on its e-commerce and marketing strategy. LSH Lighting now manages its e-commerce and marketing activities entirely through its own in-house team. Among the enhancements done by LSH Lighting's in-house sales and marketing team include stepping up its digital advertising activities by increasing the frequency of paid advertisement for its lighting products on various social media platforms such as Instagram, TikTok and Xiaohongshu to increase its brand presence and engagement with its target customers on e-commerce platforms, as well as collaborations with content creators on social media platforms such as TikTok and Xiaohongshu to promote our Group's products and reach out to a wider audience base as part of our Group's strategy to increase our brand awareness and sales. Our Group had also in September 2023 implemented a real-time inventory management system that is accustomed to our Group's business operation to enhance our Group's inventory monitoring and control system. Such system allows real-time tracking of inventory movement of the goods sold across all retail branches which improves stocktaking, stock transfer and storeroom management processes, which in turn, maximises the efficiency and effectiveness of our Group's business process. For information purpose, the actual annual total costs spent on marketing activities during the last three (3) FYEs 2022, 2023 and 2024 is approximately RM100,000. Such costs were funded entirely using our Group's internal funds.

3. DETAILS OF OUR PUBLIC OFFERING *(Cont'd)*

	• As at 15 June 2021, we have already invested in digital advertising on social media platforms (such as Facebook and Instagram). The estimated cost for marketing activities over the span of 1 year is approximately RM100,000 which will be funded via our internally generated funds.
